Materials Engineering graduates from Polytech Grenoble are strong all-around materials engineers and scientists capable of understanding all materials present in our environment, from polymers and metals to ceramics and composite materials.

Recent graduates have secured positions like:
- R&D engineer
- Quality-control engineer
- Materials engineer
- Design engineer
- Manufacturing or production engineer
- Process engineer
- Sales engineer

Graduates have mastered specific competencies that prepare them to handle real-world professional situations:

<table>
<thead>
<tr>
<th>Competency</th>
<th>Situation</th>
</tr>
</thead>
</table>
| Using the appropriate methods of analysis to identify malfunctions and/or adapt to changing conditions | • Correcting product failures  
• Keeping pace with changing markets  
• Responding to process drift |
| Using scientific experimentation and interpreting the results of an experiment to respond to a project’s specifications | • Characterizing or improving the implementation of changing materials, products, and processes |
| Coming up with new ideas to fuel innovation                                | • Designing new materials, products, and processes  
• Promoting cross-disciplinary cooperation  
• Keeping up to date with the state of the art  
• Recommending innovative strategies and technological breakthroughs |
| Staying ahead of technological advances and keeping pace with a changing professional environment | • Coping with new professional environments (geographical location, topics, techniques)  
• Keeping pace with regulatory changes  
• Staying ahead of trends (technical, ecological, geopolitical, and societal) |
| Coordinating human and technical resources                                 | • Managing a team  
• Setting up and managing international projects  
• Making decisions, choices, and recommendations |
| Demonstrating awareness and improving his/her interpersonal and written communication skills | • Promoting and explaining his/her work orally and in writing  
• Gathering information, determining what is relevant, and sharing with others  
• Raising others’ awareness of work-related issues |

In-company placements:
- Third year: 8 weeks
- Fourth year: 12 weeks
- Fifth year: 22 weeks

Graduation project: for external customers
[companies or research labs]

A selection of companies that have hired Materials Engineering graduates:
- ARKEMA, BECTON DICKINSON, CEA, EDF, STMICROELECTRONICS, TEFAL, VALEO
